

## Learn How to Turn Your Collections Into Open Access (OA) Funding for Your Institution: IGI Global Provides OA Opportunities to Asia Through Their Libraries

Due to the overwhelming success of IGI Global's [Open Access \(OA\) \(Offset Model\) Initiative](#) that is offered through their [InfoSci®-Journals](#), a database of nearly 25,000 peer-reviewed articles with 1,000,000+ citation references sourced from 185+ scholarly journals, the academic publisher has extended this initiative to apply to their [InfoSci®-Books](#) database of 4,500+ reference books containing nearly 100,000 chapters focusing on emerging research.

As such, when an institution invests in IGI Global's InfoSci-Books and/or InfoSci-Journals database, IGI Global will match the library's investment with a fund of equal value to go toward subsidizing the OA article processing charges (APCs) for their faculty at that institution when their work is accepted under OA into an IGI Global reference book or journal.\*

This initiative will not only ensure that libraries are able to acquire the latest research across 350+ topics in [11 core subjects](#), including business, computer science, education, engineering, social sciences, and more, but it will also allow librarians to support a sustainable OA model by assisting their patrons in finding credible and non-predatory publishing outlets. Additionally, it will allow librarians to increase the level of engagement within their collections and showcase the importance of utilizing the resources within their library.

With over 82,000+ Asian researchers joining IGI Global's community of 100,000+ contributors worldwide, institutions across Asia are taking advantage of this program including the most recent contributions from Ms. Rongrong Ji, from Nanjing University of Aeronautics and Astronautics, China. "As a graduate student, receiving the support from IGI Global's [OA Fee Waiver \(Offset Model\) Initiative](#) is quite meaningful for me to strive for a master's degree. It also encourages me to continue to work for a higher degree," stated Ms. Ji.

For more information on IGI Global's [OA Fee Waiver \(Offset Model\) Initiative](#) or IGI Global's [InfoSci-Books](#) or [InfoSci-Journals](#) databases, contact your iGroup Representative or IGI Global at [eresources@igi-global.com](mailto:eresources@igi-global.com).

**About IGI Global:** In the age of technology-driven knowledge discovery, timely dissemination of research is critical as resources become quickly outdated. In response to this phenomenon, and to ensure that your library can easily and affordably acquire the latest peer-reviewed research findings, IGI Global has streamlined its publishing process and created an agile business-model to ensure that your library can acquire the most emerging research through IGI Global's award-winning [InfoSci-Books](#), a database of 4,500+ reference works containing nearly 100,000 chapters, and [InfoSci-Journals](#), a database of nearly 25,000 peer-reviewed articles with 1,000,000+ reference citations sourced from 185+ scholarly journals. These databases span across 350+ topics in [11 core subjects](#) including business, computer science, education, engineering, social sciences and humanities, and more.

\*The Open Access (OA) article processing charge will be waived after the student, faculty, or staff's paper has been vetted and accepted into an IGI Global reference book/ journal.
