

APPENDIX 22. A: NIRF Ranked Universities

I checked the NIRF rankings for the top 100 universities and colleges, Universities with Potential for Excellence (UPEs) and Centres with Potential for Excellence in Particular Area (associated with universities) CPEPA yielding a total of 136 institutions. See Table 22.A.1.

Seven IITs and three universities were on all lists. Only 18 of the 100 ranked universities were on at least THE, QS or US News. Only IIS appears on ARWU and NTU Taiwan rankings as well.

At least 80 are ranked by SciMago Institutions Rankings and over 125 are in Ranking World of Universities. Counts are not exact because of name disambiguation and different coverage of research institutes.

Appendix B maps the official government rankings to Incites and SciVal and Appendix C maps commercial rankings to the government rankings.
