

APPENDIX 45-1: TOP Factor Integration into Clarivate Analytics' Master Journal List

In this article's conclusion, I recommend the creation of a product combining qualitative publishing requirements with bibliometric output metrics. It would support the growing emphasis on open scholarship with traditional metrics used to identify quality journals and would be useful to researchers and librarians. The integration of TOP Factor Standards into Clarivate Analytics' [Master Journal List](#) is a step in that direction. Master Journal List includes all publications on the Web of Science Platform. It is a free tool. Registration is required to view the journal profiles. The Journal Impact Factor is included but not the supporting data.

Below is an example of TOP Factor Standard ratings in the Master Journal List record for *Public Administration Review* which is categorized under the Business & Management discipline in TOP Factor.

The screenshot shows a search interface for the Master Journal List. On the left, there is a sidebar with a 'manuscript?' section and a 'Filters' section. The search bar contains the text '"Public administration review"' and a 'Search' button. The results section shows 'Found 3 results (Page 1)' and a 'Share These Results' link. The main result is for 'PUBLIC ADMINISTRATION REVIEW', which is marked as an '(Exact Match)'. The journal details include: Publisher: WILEY, 111 RIVER ST, HOBOKEN, USA, NJ, 07030-5774; ISSN / eISSN: 0033-3352 / 1540-6210; Categories: SOCIAL SCIENCES, GENERAL | PUBLIC ADMINISTRATION | POLITICAL SCIENCE & PUBLIC ADMINISTRATION; Web of Science Core Collection: Social Sciences Citation Index; Additional Web of Science Indexes: Current Contents Social And Behavioral Sciences | Essential Science Indicators. A blue arrow points to the 'Essential Science Indicators' text. At the bottom of the result card, there are 'Share This Journal' and 'View profile page' buttons.

As shown in [Table 45-4](#), not all TOP journals are in Web of Science. Those included may be categorized under different WOS subjects. Login is required to view the profile and determine if The Center for Open Science information is included in this record.

This record has both the Journal Impact Factor and Center for Open Science Information.

Journal Metrics

2018 Journal Impact Factor: 4.659 **Category:** Public Administration

All other bibliometric data requires access to Journal Citation Reports. This does not allow for rankings or comparisons.

Public Administration Review's JIF of 4.695 places it 2nd in Public Administration. It would be 25th in business.

Center for Open Science Information

Transparency and Openness Promotion Guidelines (TOP) Factor:

5

What is Transparency and Openness Promotion Guidelines?

Transparency and Openness Promotion Guidelines (TOP) is a metric that reports the steps that a journal is taking to implement Open Science practices.

What is Center for Open Science?

Center for Open Science (COS) is a non-profit technology company providing free and open services to increase inclusivity and transparency of research. This data is provided by COS.
